

VEDIKA NAVANI

vedika.navani_ug2024@ashoka.edu.in, 20 yrs

9867342660

EDUCATION

B.Sc in Mathematics and Computer Science, Minor in Economics	Ashoka University	2028	3.60/4 CGPA	
Summer Session (Economics)	London School of Economics	2026	A+	
Class XII	Jamnabai Narsee School	ICSE	2024	94.00 %
Class X	Jamnabai Narsee School	ICSE	2022	90.00 %

AWARDS AND ACCOMPLISHMENTS

Named to the **Dean's List** for academic excellence, maintaining a **3.77/4** major GPA while remaining on track to graduate with Latin Honours distinction

SKILLS

Python, Data Analysis, PyTorch, Machine Learning, Statistical Inference, Pandas, SQL, Natural Language Processing, Stata, NumPy, Excel, Modelling

INTERNSHIPS EXPERIENCE

ERNST AND YOUNG | *Data Analytics Intern* Jun 2025 - Aug 2025

Big Four firm; its Data & Analytics practice drives data-driven decision-making for clients across industries. [Selected from 100+ applicants]

- Reconciled loan records across a client bank's consumer loan portfolio via **SQL**, standardizing reporting across **10+** branches with inconsistent coding
- Engineered a **Pandas**-based script to flag incomplete delinquency data from a system migration, ensuring accurate weekly 30/60/90-day calculations
- Developed a **Power BI** dashboard tracking loan delinquency by region and type, streamlining a previously manual weekly reporting process

ASHOKA UNIVERSITY, THE LODHA GENIUS PROGRAM | *Teaching Assistant, Mathematics & Computer Science* May 2025 - Dec 2026

Teaching role spanning undergrad courses and Ashoka's pre-college fully funded program for gifted students. [Selected from 200+ applicants across roles]

- Selected from a pool of **40+** applicants to assist Abhishek Khetan in teaching Quantitative Reasoning and Mathematical Thinking to **110+** students
- Supported course evaluation by creating and grading **20** problem-based and code-based assignments and exams in multiple programming languages
- Served as a Teaching Assistant for **4** advanced applied math courses within the Lodha Genius Program, spanning linear algebra and statistics

ABC CONSULTANTS | *Financial Services & Data Intern* May 2026 - Jul 2026

India's leading executive search firm, with a dedicated BFSI vertical advising banks on workforce strategy. [Top 5 out of 50+ applicants]

- Modelled attrition trends across **50K+** BFSI workforce records, **100+** firms, to forecast quarterly talent demand and deliver strategic recommendations
- Engineered data-driven cost models projecting hiring budget impact for **5** BFSI clients, presenting analyses that informed workforce decisions
- Automated key BFSI hiring reports through scripting, reducing manual reporting time **30%** and improving turnaround for stakeholder reviews

PROJECTS

Research Assistant - Machine Learning Jun 2025 - Aug 2025

- Worked under Profs. Meghna A. (Columbia Uni) and Aalok T. (UPenn), analysing **100+** bioacoustic recordings for sound-classification development
- Fine-tuned Google's **YAMNet** model, improving classification performance on the project specific dataset through transfer learning and retraining
- Built preprocessing pipelines to clean and segment raw audio data, substantially boosting model accuracy and reducing training time significantly

Research Assistant - Stochastic Calculus; Network Science May 2025 - Jun 2025

- Authored a **15+** page research paper under Prof. Sarvesh Iyer modeling sequential decision-making under complex uncertainty using stochastic processes
- Formalized agent behavior as a Markov-driven system over probabilistic state spaces, explicitly capturing transitions across uncertain environments
- Engineered frameworks characterizing stationary distributions and convergence, applying probabilistic inference to analyze equilibrium dynamics

Monetary Policy Classifier - Natural Language Processing Jun 2026 - Jun 2026

- Created a tool using **PyTorch** and **scikit-learn** that classifies central bank statements as hawkish, dovish or neutral based on prediction of future policy
- Built an **NLP** pipeline leveraging transformer-based embeddings and attention mechanisms to extract sentiment signals from unstructured text
- Engineered feature extraction using **TF-IDF** representations, benchmarking classifier performance across logistic regression and ensemble models

POSITIONS HELD

Director of Computational Finance and Applied Statistics | Association of Computing Machinery Aug 2026 - May 2027

- Working with Prof. Debayan Gupta (MIT, Yale) and the computer science department to head a team of **10** students working on live projects
- Using tools such as **Pandas**, **NumPy** and **Next.js** and to build tech tools focused on data analysis and pattern recognition in the BFSI industry for clients
- Building automated data-analysis workflows and interactive dashboards to surface actionable insights from large-scale BFSI datasets for clients

Editor-in-Chief | Ashoka University Economic Review Jun 2026 - Present

- Leading an editorial board of **8** members including master's students to publish the Ashoka peer-reviewed undergraduate economics journal
- One of **15** people in leadership managing the economics society, the largest society on campus with **100+ members** and **500+** applicants annually

Director of Programs and Strategy | Mathematics Society Aug 2025 - Jan 2026

- Led **25+** students to plan and execute **10+** campus-wide math events and speaker sessions, managing logistics, outreach, and engagement end-to-end
- Collaborated with **5+** clubs and societies to organize interdisciplinary workshops bridging mathematics with computing, economics, and other fields

Writer | The Edict Aug 2025 - May 2026

- Writer and editor for the on campus newspaper, receiving **13k+** views across platforms for articles focused on STEM and Economics departmental topics
